LRR	98.6%	98.9%	100.0%	99.2%

\*(1 return, 3 confiscates, 10 transfers in)

**Other Animals Include:**

1 rabbit

The ABCs

### of Calculating the Live Release Rate

The live release rate is calculated as follows: C divided by A. Conversely, its death rate is B divided by A. The live release rate plus the death rate should always equal 100% of outcomes.

A

**All animals with final dispositions/outcomes, including live outcomes (adoption, transfer, reclaim) and those who died, are missing/stolen, and were killed, including "owner requested euthanasia," with only the following exception:** animals brought to a shelter's medical clinic for procedures such as vaccines or sterilization where it was understood that the animal was going to be retrieved following the medical procedure.

B

**All deaths:** animals who were killed (including "owner requested euthanasia"), animals who died in the shelter's custody or constructive custody (such as foster care), and animals who are missing and unaccounted for.

C

**All live outcomes:** those adopted, reclaimed by their families, and transferred to No Kill rescue groups or other shelters (where they are not at risk for being killed). It does *not* include animals still in the shelter's custody or constructive custody (such as foster care).

Report format designed using the No Kill Advocacy Centers Guide "Calculating an Animal Shelters Live Release Rate - <http://www.nokilladvocacycenter.org>
