

## GENERAL CAPITAL PROJECTS FUND

The General Capital Projects Fund is used to account for the acquisition of general fixed assets of the County. Fixed assets for the water and sewer system are accounted for in a separate fund, the Water and Sewer Capital Projects Fund. Fixed assets for the Solid Waste system are accounted for in the Solid Waste Fund. Fixed assets for the Department of Social Services are shown in their operating budget, as required for state reimbursement as are those for the Health Department. The first year of the 6-year Capital Improvements Program (CIP) becomes the capital budget for the next fiscal year. It is budgeted in this fund. For purposes of the CIP, a capital project is defined as a fixed asset having a useful life of at least two (2) years and costing \$5,000 or more. Smaller fixed assets that can be purchased or constructed within the fiscal year are budgeted in the normal budget process.

The General Capital Projects Fund receives its revenues from transfers from the General Fund or in some cases from other funds, federal and state grants, loans, general obligation (GO) bonds, certificates of participation (COPS), capital leases, and other forms of debt issuance. Smaller fixed assets that can be purchased or constructed within the fiscal year are budgeted in the normal budget process.

NCGS 159-13.2 authorizes counties to adopt capital project ordinances for major projects that may take longer than a year to design and build. Such a project ordinance is adopted not for the current fiscal year, but for the time it takes to complete the project. For example, a major building would be budgeted in a capital projects ordinance, and the appropriations would continue over the two and one-half years it took to acquire the property, design the building, bid the construction, and complete the construction.

This fund accounts for numerous smaller capital projects and equipment, as well as the major capital projects. Appropriations do not lapse at year-end, but continue until the asset is purchased.

General obligation bonds require approval by referendum in most cases. However, state law allows a county to issue general obligation bonds without voter approval for up to 2/3 of the amount of "net principal" paid off in the previous fiscal year. The net principal amount is determined by taking the amount of debt principal paid off in the previous year, then subtracting the principal added in that year from any new debt issued. For example, if a county paid off \$7,000,000 of principal in a year, but issued new debt of \$4,000,000 in that same year, the "net principal" reduction for the year would be \$3,000,000. The county could issue general obligation bonds up to 2/3 of that amount, or \$2,000,000, without a referendum. This 2/3 bond capacity is not cumulative. If it is not used in that specific fiscal year, the county loses that bond issuance capacity.

There were numerous requests from departments for capital items and projects in FY15. To a certain degree, this reflects requests from prior years that were denied and delayed due to fiscal constraints attributed to the Great Recession. Since revenues are projected to be flat for the most part in FY15, it becomes readily apparent that departmental requests

for capital will have prioritized, reduced, and in some cases delayed until a future fiscal year. In FY15, the greatest priority has been placed upon facility needs, vehicle replacements, and hardware/software updates. These are seen as basic necessities required to keep our departments operating at a steady-state in order to continue providing acceptable levels of service to the citizens of Lincoln County.

**SUMMARY OF PROJECTS BY FISCAL YEAR:  
CAPITAL IMPROVEMENTS PROGRAM FUND**

Project Number	Project	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	TOTALS	County Manager's Notes
AIRPORT	Airport TIP Projects	\$ 30,000	\$ 30,000	\$ 30,000	\$ 30,000	\$ 30,000	\$ 30,000	\$ 180,000	5% County Match for FAA Funds
AS-1	Vehicles-Replacement	\$ 27,000	\$ 65,000	\$ 62,000	\$ -	\$ -	\$ 54,000	\$ 208,000	Request reduced

<b>Lincolnton-Lincoln County Regional Airport (BLUE AIRPORT) TRANSPORTATION IMPROVEMENT PROGRAM (TIP) 2014-2020 PROJECT LISTING</b>			
PROJECT	DESCRIPTION	FISCAL YEAR	TOTAL EST. COST
Common Transient Hangar	Build a new hangar to house transient aircraft and another tenant.	2014	\$640,000
Self Serve AV-Gas Facility	A new 10,000 Gallon Self Serve AV-Gas Facility is proposed to provide 24-hour self-service for AV-Gas customers.	2014	\$425,000
Obstruction Survey - Runway 5 Approach - 30:1 Surface	Perform a survey for the approach to Runway 5 to locate obstructions in the 30:1 approach surface.	2014	\$20,000
Land Acquisition - Runway 5 Approach - 30:1 Surface	Acquire land/avigation easements needed to remove obstructions observed in the obstruction survey.	2015	\$175,600
Terminal Area Expansion - Phase 1 (Site Prep)	In order for the Airport to be able to attract and accommodate additional based aircraft with new corporate hangars, the existing terminal area must be expanded to the west. With the new Terminal Building completed, the expansion of the terminal area will be critical for further growth. The area designated in this phase consists of the site preparation for additional corporate hangar taxilanes on the south side of the future corporate hangar sites (see below for paving of corporate taxilane). This project is considered by the Airport Authority to be of significant economic impact to the airport and favorable funding consideration is respectfully requested.	2015	\$1,375,000
Terminal Area Expansion - Phase 1 (Paving)	A new corporate taxilane is needed to provide access to new corporate hangar sites made available by the terminal area expansion described in the previous item above. This project includes paving the taxilanes made available by the terminal area expansion site preparation described in the previous item. This will provide significant positive economic impact to the airport	2016	\$1,153,000
Obstruction Removal - Runway 5 Approach - 30:1 Surface	Remove obstructions in the 30:1 approach surface of Runway 5.	2016	\$295,000
New Fuel Farm	The existing fuel farm is over 15 years old. The typical life expectancy of aviation fuel tanks is approximately 15 years. Additionally, special tanker trucks are required to deliver fuel due to restricted piping for delivery. New EPA regulations require secondary containment for the loading and offloading pad where the tanker truck parks to deliver fuel and the Airport re-fueler trucks park to pick up fuel. A new fuel farm is proposed to address these issues.	2017	\$750,000
Terminal Area Expansion - Phase 2 (Site Prep)	This is a continuation of the Terminal Area Expansion Site Preparation-Phase 1 work proposed above. The work proposed for Phase 2 includes the area north of Phase 1.	2019	\$1,563,000
Terminal Area Expansion - Phase 2 (Paving)	A new corporate taxilane is needed to provide access to new corporate hangar sites made available by the terminal area expansion described in the previous item above. This project includes paving the taxilane made available by the terminal area expansion site preparation described in the previous item. This will provide significant positive economic impact to the airport	2020	\$1,486,000
South Development Area	This project will extend the taxilane off of the south end of the apron and add an additional corporate/transient hangar.	2020	\$650,000
New Helicopter Parking Areas	Due to increased demands from helicopter traffic at the airport, two helicopter parking areas are proposed north of the existing aircraft parking apron. The parking areas will each consist of a 50-foot by 50-foot concrete pad, with elevated edge lighting and a paved access drive to the aircraft parking apron.	2020	\$195,000
Total all improvements			\$8,727,600

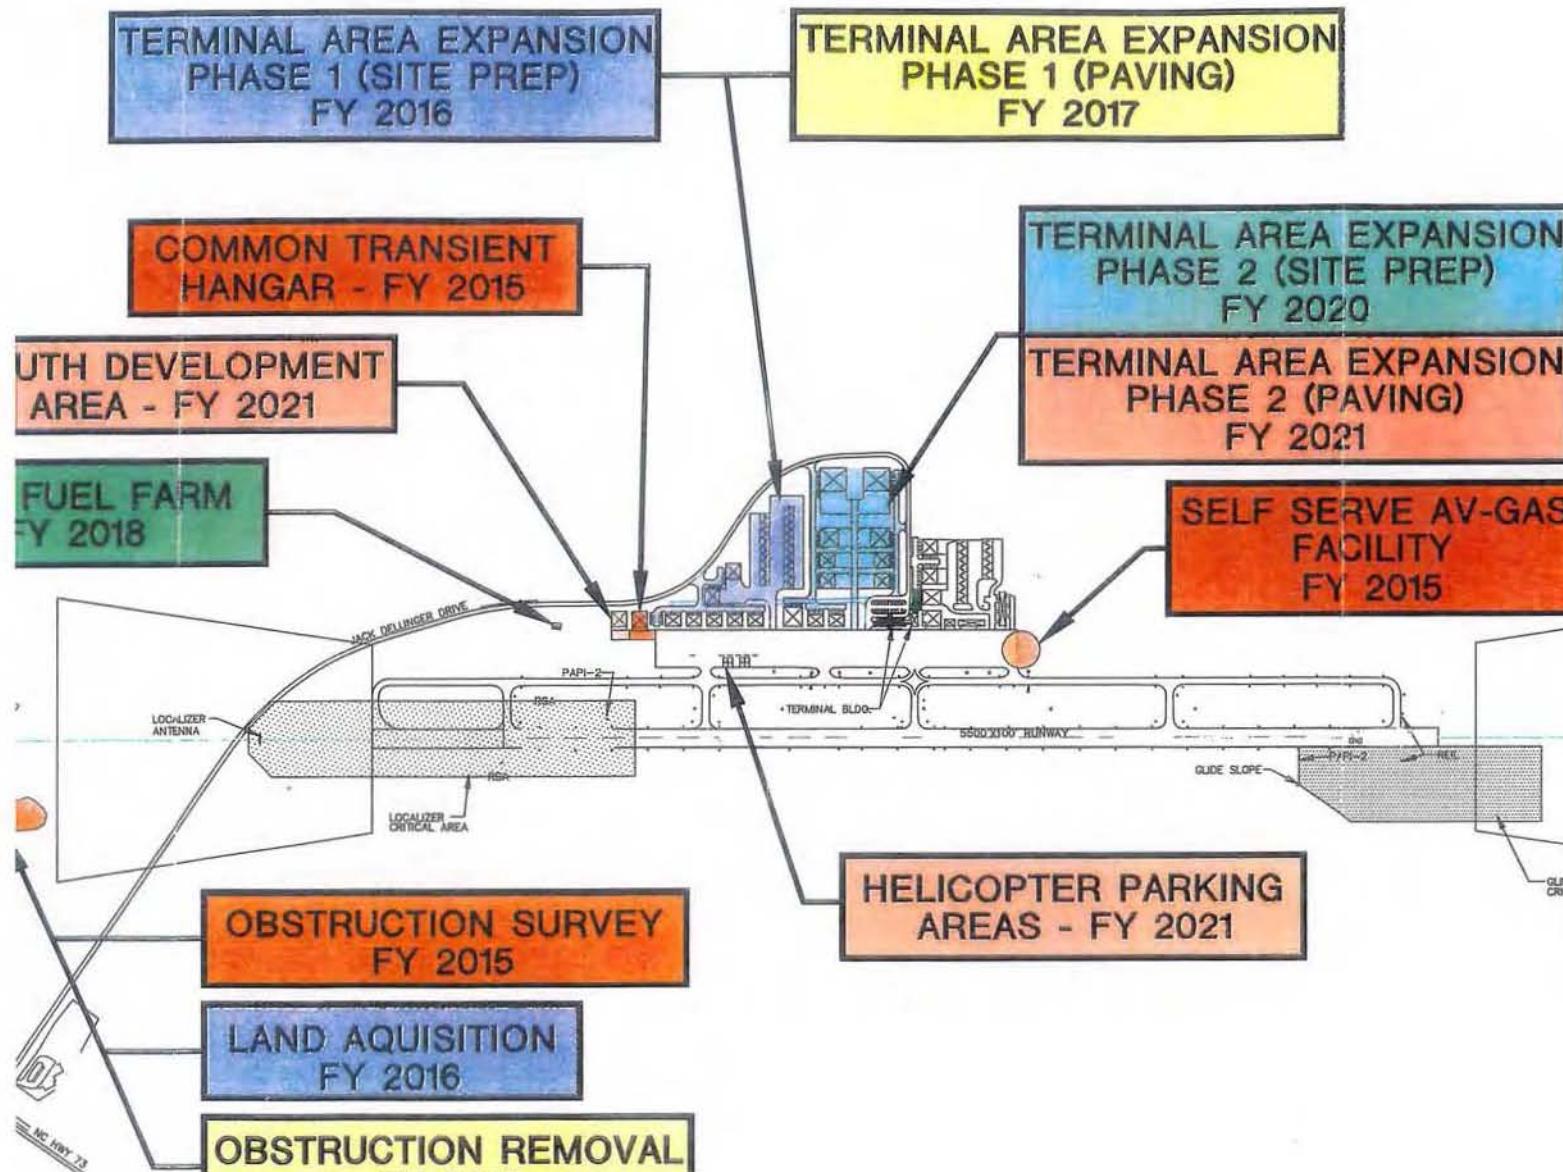

I CERTIFY THAT THE PROJECTS REQUESTED IN THIS 2014-2020 TIP SUBMISSION HAVE BEEN REVIEWED BY THE GOVERNING BOARD OF THE SPONSOR RESPONSIBLE FOR FUNDING THE LOCAL SHARE OF THE PROJECT AND THAT SAID BOARD HAS FORMALLY APPROVED THE SUBMISSION OF THESE REQUESTS FOR STATE AID TO AIRPORTS (AND THE STATE BLOCK GRANT PROGRAM WHERE APPLICABLE)

LINCOLN COUNTY, NORTH CAROLINA

JUSTIFICATION AS-1 Vehicles-Replacement

The current fleet consist of a mixture of Ford F-150 and Dodge 1500 Pickup Trucks with ACO Box inserts. The Ford chassis have continued to be plagued with mechanical problems and Ford has made no attempt to resolve them. The Dodge 1500 Chassis Pickup has a great track record of low maintenance and operating cost

FY 2016 initiate replacing all truck boxes with temperature controlled units.  
Dept of AG focusing on tempature controlled boxes on ACO trucks

SOURCES OF FUNDS												
General Fund	\$ 670,000						\$ 670,000					
TOTAL FUNDS	\$ 670,000	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 670,000					

LINCOLN COUNTY, NORTH CAROLINA

JUSTIFICATION

B-11 Citizens Center HVAC system

HVAC units are in poor condition.

The Current Boiler is electric and has aged wiring and components. It may be better to replace with a natural gas unit. The two chillers are aged. One chiller is currently not functional, which does not provide a redundant unit when the other chiller is broken or out of service.

The controls are pneumatic. The system has leaks and failures which makes it difficult to manage the temperatures in the building. We anticipate savings with a gas system, new controls, and replacement with a new HVAC system.

LOCATION MAP

ANNUAL OPERATING BUDGET IMPACT:

\$	(12,000)	Personnel No additional Operations and Maintenance (Energy Savings) Currently budgeted, if improvements to HVAC & lighting we made utilities would be reduced. Other Capital Outlay

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION B-15 Gaston College Barrel Roof

This building was renovated 1998 to be used as Gaston College. The interior was upgraded but the roof and exterior was not, there were some areas that were added and received new roof. All existing roofs are well older than that and are beginning to sprout small leaks. There was a 3ft section along one parapet wall that was repaired early 2012, this fixed the leak in that area but the remaining roof is in need of repair or replacement. Unknown age of original roof. Roof was in place before county gained control of building.

PROJECT	B-17	Facility Improvements-Community Corrections (Adult Probation & Parole) Relocation							
DEPARTMENT	Courts	FUNCTION	Courts						
DESCRIPTION									
STATUS	Building renovations to upfit/prepare office space for Adult Probation & Parole. These are offices are currently housed in two different buildings being leased by the County at a cost of approximately \$53,000 per year. Moving these offices to the Old Hospital will save the County money by avoiding the ongoing costs for lease payments. Part of the costs for this project will be covered in the FY14 budget while the remainder will occur in FY15 with expected project completion by September 2014.								
PROJECT BUDGET	PROPOSED FY 2015	PROJECTED FOR FUTURE YEARS							
		FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	TOTAL

LINCOLN COUNTY, NORTH CAROLINA

**JUSTIFICATION**

In 2013, the meeting room, lobbies, and office areas had new ceiling tiles installed which greatly improved the lighting in those areas. The project was broken into two phases with the remainder of the ceiling tiles scheduled to be replaced in 2016, once the roof on the Jonas library was replaced.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

In 2012-13, the carpet at the Jonas library was replaced in the meeting room, local history, office areas, and around the public internet computers as part of phases 1 & 2. The final phase is scheduled for 2016, after the new roof on the Jonas library is complete. Stack movers can be rented to prevent staff from moving books.

LINCOLN COUNTY, NORTH CAROLINA

JUSTIFICATION EMS-1 Apparatus Expansion and Replacement

The current GMC ambulance fleet has held up well and we will start the remount process this year on 3 units. The GMC 3500 Type III chassis have been greatly improved over the last three years. The GMC chassis do not require an air ride systems which was one of our primary maintenance concerns. They also are equipped with the Duramax engine which has proven to be very stable and requires considerably less maintenance than the Fords.

Initially we are establishing a standard 5 year remount for ambulances however, we believe that we can extend this out to the 6 year mark and still ensure a new chassis before major maintenance cost are incurred. Increasing the ambulance fleet will also increase the service life and reduce the frequency for routine services. Presently half of our units are running 24 hours per day and are only out of service during periods of maintenance and repairs.

### JUSTIFICATION HTH-8 Health Dept Roof Replacement

A portion of the roof at the Health Dept is more than 30 years old. We have been chasing leaks in this area for several months now and have had contractor make repairs but there are still leaks. This area of roof is on the original section of the building and was not reroofed when additions were made

We propose replacing the built up tar and gravel roof with PVC roof membrane. This will protect us from moisture and mold inside the building

<b>PROJECT</b>		IT-011 - Email Archive & Retrieval System									
<b>DEPARTMENT</b>	Information Technology	<b>FUNCTION</b> Provide Automated Method to Archive County Email									
<b>DESCRIPTION</b>	The county email system processes roughly 80,000 valid email messages a month and as many as 75,000 spam emails a week. Due to the immense amount of time and effort required to mitigate the needs for regulatory compliance, litigation support and/or storage management, the County needs to move from a manual archiving method to an automated email archival system. An email archive system will Archive all email messages – inbound, outbound, internal, external, and attachments. The Archive system will leave messages unaltered with their original format and metadata in tact, as required by the Federal Rules of Civil Procedure and will allow for easy retrieval of any message and attachment, even if the user deleted or altered it.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

As a tool, an archival system is a huge timesaver when you need to find a specific piece of information in email. It lets you peruse archives via search engine and use query like commands to manage large email requests. Also, email archiving solutions are used to reduce the size of County email storage. Most importantly, when used with a email retention policy, automated email archiving will ensure uniform email collection and retention, increase employee and IT productivity and put a system in place that can ensure message protection if a litigation hold or public records request procedure is instituted.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

This project will consist of hiring consultants to test the County's network from the inside and outside and at various different locations to scan it for potential security issues. IT staff will be interviewed and security policies reviewed. They analyze firewall rules and any other security products on the County uses. They test routers, switches, and Wi-fi devices to make sure the network is performing as expected. This will produce a final report which can turn into a working remediation document and often the consultant will offer additional services to fix the issues they uncover. During a penetration test, a security firm acts as if they were an outsider trying to break into the County network to steal data. The firm uses a security scanner to look for exposed vulnerabilities. They might use open source tools like Nessus or a commercial product like Core Trace. They check for IP addresses, open ports, and vulnerable versions of applications like Telnet, FTP, or mis-configuration in DNS servers. Once they know those they attempt to exploit the vulnerabilities to get in.

## LINCOLN COUNTY, NORTH CAROLINA

**JUSTIFICATION:** Our security camera system currently consists of two separate systems. We do have a new system in place that covers areas we did not have visual surveillance of prior to installing it. However, that upgrade did not replace the existing areas that the old system covered. This old system is 15 years old and needs to be updated. The updates would consist of replacing the antiquated cameras with modern cameras which can be installed by our IT department and would not require out sourcing of labor. This old system also requires us to update our DVR system which consists of a new DVR video capture card and DVR storage hard drive.

LINCOLN COUNTY, NORTH CAROLINA

**JUSTIFICATION:** Per our Vehicle Replacement Schedule, we will have one vehicle (Transport Vehicle) that will mile out and need replacing in 2015. This vehicle accrues unusually high mileage due to its purpose which is to Transport inmates from our facility to other facilities across the state on a weekly and sometimes daily basis. This type of wear and tear is extremely hard on a vehicle and due to the officer being on the road away from Lincoln County so often it is necessary to keep this vehicle with no more than 120,000 miles.

## LINCOLN COUNTY, NORTH CAROLINA

## **CAPITAL IMPROVEMENTS PROGRAM**

LINCOLN COUNTY, NORTH CAROLINA

**JUSTIFICATION:** We have 30 HVAC units covering our facility. We have had to replace 8 units since their installation in 1999. Our vendor Criswell Services provides preventative maintenance on these units but we are having more and more needing repairs and needing them more often. The original units were not meant to last as long as we have used them. We replace approximately 5-8 compressors each year and are seeing the need to replace them more often because these units are not heavy duty enough to withstand the amount of usage that we are forcing upon them. Criswell is anticipating replacing at least 10 compressor on the ones that they can, but some have motor damage as well and the entire unit will have to be replaced. Frequent access to repair the units are also causing damage to the membrane of our roof and it therefore causing additional repairs to be needed. If we do not maintain these units we also experience leaks into our records storage area causing damage to critical records which we are required to store. Much of the problems lie in the fact that these units were purchased new but were considered obsolete when we purchased them at a reduced price. Because we have so many units and because of the price it is our opinion that we should replace the worst units each year on a rotating basis in order to spread the cost over as many years as possible.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

The Shanklin library has reached its capacity in many ways. Children's story time had to be split on two different days in 2013, to accommodate the people in the public meeting room as well as the parking lot. Summer reading programs and many children's programs now require advance sign-up in order to comply with fire codes. Some programs have to be held off site at either the schools or local churches which defeats the purpose of having library materials available when patrons come to library-sponsored events. The seating in the main library is also limited. The entrance to the library is not on county-owned property but relocating that it would eliminate parking. If property adjacent to the existing facility can not be secured, it may be necessary to either relocate the library or expand to a second facility in the Denver/Iron Station area.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

The Planning & Inspections Department currently has nineteen vehicles in its fleet. Nine of the nineteen vehicles are older than five years and have odometer readings of greater than 100,000 miles. The department strives to keep all of their vehicles maintained and running well. Vehicles are kept until it is cost prohibitive to continue their maintenance. Over time a cycle of purchasing has developed where a couple of vehicles are purchased each fiscal year and older vehicles are phased out and sent to auction. The use of reliable vehicles has been a critical component in conducting the county's business. Until FY2013, when two vehicles were purchased the department had gone without vehicle purchases for a period of four years. This four year period put the department behind in its replacement schedule and many vehicles approached the end of their useful life. One particular vehicle that will be replaced in FY 2015 is the heavy duty truck used by the street sign maintenance position which was transitioned to this department in 2010. This purchase was delayed from FY2014 but the truck will have over 200,000 miles on it at the end of FY2014.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

Lincoln County's five townships are each facing their own set of planning related challenges. The inadequate transportation infrastructure that exists in Catawba Springs is a distant thought to the residents of North Brook who are more concerned with the continued viability and protection of agricultural production. Each township contains a different set of variables related to water, sewer, schools, employment, environment and zoning. Individual townships need to have their particular needs identified and in turn have a focused planning mechanism in place that guides the long term development of each. Township plans would focus on setting the framework to guide more educated decisions by staff and elected officials.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

Through previous technology funding staff is now able to complete many projects in house that were once assigned to consultants at much higher costs. Staff will continue to persue advancement of technology to prevent the over use of consultants. Replacement of aging computer hardware for many staff members is top priority over the past few years. Many of the computers in the office are approached 10 years of age and need replacement. The current plan for the capital technology allotment woudl be to mobilized our building inspectiosn through the use of tablet computers. Future CIP years incorproate projected changes to our permitting software and inclue higher than normal requests to offset upfront capital costs.

TOTAL FUNDS	\$ -	\$ 30,000	\$ -	\$ -	\$ -	\$ 30,000	

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

The last update to the Lincoln County Land Use Plan was completed in 2007 by Centralina Council of Governments. In order to stay relevant Land Use Plan should be update every 5-10 years. This proposal to update the Land Use Plan in FY 15 puts the start of the update process towards the end of the recommended time period. The North Carolina General Statutes require reference to a land use plan in all zoning decisions and updates to land use ordinances. Updates to Lincoln County's Comprehensive Transportation Plan which is scheduled by NCDOT in FY15 as well requires a recently updated Land Use Plan in order to be adopted. The updated land use plan would be completed by county staff and would involve multiple public input sessions across the county.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

Corridor planning efforts enable the county to respond to the land use changes that are occurring or are anticipated to occur along developing corridors. The county has previously partnered with other jurisdictions to study the NC73 corridor. The plan for implementation would be to complete and update of the NC 73 corridor study as well as to complete basic studies of NC 150 and NC 27. A more in depth study of NC 16 business is also planned. These studies are similar to small area plans as they provide a framework for future land use decisions and can help more accurately shape future land use plans along these linear facilities.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

The planning and prioritization for small areas in the county has been a goal of previous commission. These small area plans allows the community in conjunction with the Planning Board, Board of Commissioners and staff to developed targeted and focused plans on defined area where growth is anticipated to occur quickest. These small area plans which are simply policy statements can signal when the tightening or loosening of the base standards provided in the UDO are necessary. These guiding tools can provide the framework for future land use decisions. The previous sequencing of the small area plans has been maintained with simply a slowing of the timeline by which will be used to complete the plans.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

With facilities located over 30 miles apart, plus additional acquisition of Lincolnton Optimist Park and new Rock Springs & Rescue Parks, maintenance staff is divided into crews. Currently using vehicles surplused from other departments, which have high mileage/age.

Additional vehicle needed to transport equipment and staff. Mowers needed for new fields and open spaces. With anticipated growth, crews will have part-time workers and be divided into smaller units for daily maintenance.

Increased use of all equipment, especially mowers and vehicles will accelerate the timeline for replacement of these mowers and trucks.

Used vehicle (surplus from Building Maintenance) was acquired in 2010 for temporary relief for vehicles.

Note 1: Truck to be replaced has since been totaled (2001 model with high mileage, so no collision); vehicle obtained from surplus list for temporary relief until this budget cycle for funding.

Note 2: 2003 van was to replace 1993 van, loaned to library while bookmobile being replaced. Already exceeds recommended mileage.

TOTAL ALLOCATION								
SOURCES OF FUNDS								
Capital Improvements Program								
Certificates of Participation or Lease Purchase								
TOTAL FUNDS								

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

Contract for addition to facility is pending.

Certifications of Participation would provide funding for complete expansion of facility to include new meeting room to seat 150 people, as well as storage for tables and chairs. Facility is being designed to provide large meeting room on main level (same level as existing gym and small activity room). Lower level opens to parking lot and houses restrooms for the park facility (eliminating portable toilet currently needed during athletic seasons), a small maintenance area for mower and other field equipment, and a concession area for the athletic fields. Additional parking will be added to replace spaces in existing lot taken up by the expansion.

HVAC equipment will need upgrading, one unit already needing repairs, all units are original construction items from 2001, so units are nearing optimal life span. Painting needed, especially after addition completed. Lights should be replaced with brighter, more efficient fixtures, at least one cannot be repaired.

### JUSTIFICATION

The facility is needed for youth basketball practices, indoor activities such as walking, and physical education classes for Gaston College and the home school association. Recreation department is also working with Senior Services to conduct the athletic portions of Senior Games. Participants will be able to practice and compete locally during day-time hours, school facilities and other gyms are not available during these hours.

Air conditioning would allow summer use (conditional use permit restriction); providing another facility for programming, and provide Day Camp options. Summer use would allow Gaston College to begin classes for fall semester in the facility.

LINCOLN COUNTY, NORTH CAROLINA

**JUSTIFICATION**

Development of the Rock Springs Park should be complete within 3 years of receipt of PARTF grant.

Grant received in September of 2011, work must be complete by October 1, 2014.

Use of certificates of participation or lease purchase allows construction of park facility in total, rather than phased approach planned with original grant applications.

Funding from Wildlife enhancement grant was used for park design and habitat areas.

Trails will require additional pit gravel as use increases.

TOTAL ALLOCATION								
SOURCES OF FUNDS								
Captial Improvements Fund								
TOTAL FUNDS								

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

Recreation Commission formed a list of priorities of community development, using the school sites. This development will allow funding to be used for elements only, not for land purchase. This joint development will make further use of property the county already owns. These sites are already known to the community and will also serve the schools for outdoor functions and activities.

### LOCATION MAP

Throughout Lincoln County, begin at North Lincoln Middle.  
There are no county recreation facilities in the Ironton Township at this time.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

Area youth athletic organizations need tournament quality playing fields. Current facilities are not large enough to handle regional tournaments and numbers involved. This facility would have an economic development factor as well, drawing many out of town teams and fans to Lincoln County.

### LOCATION MAP

Ideal location would be in Ironton Township, between Boger City and East Lincoln Middle School. This location would make the facility accessible to the entire county's groups.

Related operational expenses are unknown at this time.  
Rental fees would generate funds to offset some of these expenses.

TOTAL ALLOCATION							
SOURCES OF FUNDS							
Capital Improvement Program Grants & Donations							
TOTAL FUNDS							
1/31/2014							

LINCOLN COUNTY, NORTH CAROLINA

**JUSTIFICATION**

Renovation of the Vale Recreation Area began approximately 5 years ago. A walking trail was added, fencing and lighting replaced, and parking lot graded. The restroom/concession building was also renovated. Playground equipment was added to further enhance the community park. The parking lot should be paved to reduce dust and mud. Driveway to facility is directly across from Union Elementary School, and it is also used as overflow parking for school events.

Field more appealing to adult teams if higher fence to compensate for shorter distance in outfield.

**LOCATION MAP**

Intersection of Reepsville and Hoover-Elmore Roads.

Staff currently maintains the facility. Additional equipment would not impact staff hours needed by significant amount.

<b>PROJECT</b>								
TAX-4		Computer-Replacements						
<b>DEPARTMENT</b>	<b>FUNCTION</b>							
Tax Administration	General Government							
<b>DESCRIPTION</b>								
Newly purchased PC computers have a three (3) year warranty/maintance. These expenditures are based on a five (5) year life expectancy for currently owned and operating PC's used for the processing of tax data. Mapping/Land record computer life expantance is three (3) years. GIS computer life expectancy is two (2) years. Reappraisal will need to replace laptops in the next two (2) years.								
<b>STATUS</b>								
<b>PROJECT BUDGET</b>	<b>PROPOSED FY 2015</b>	<b>PROJECTED FOR FUTURE YEARS</b>						
		<b>FY 2016</b>	<b>FY 2017</b>	<b>FY 2018</b>	<b>FY 2019</b>	<b>FY 2020</b>	<b>TOTAL</b>

## **CAPITAL IMPROVEMENTS PROGRAM**

PROJECT TAX-5	GIS Mapping Computer Hardware & Software							
DEPARTMENT Tax Administration-GIS/Mapping	FUNCTION General Government							
DESCRIPTION Much of the work in local government involves geographically related issues or task. GIS is the key to bringing all of this information together to maximize efficiency and effectiveness. GIS brings groups of people with different knowledge bases and helps them understand problems through a common interface. This strategic plan empower us to provide effective service to all our customers. We look forward to working with all of our departments and customers to make the GIS Department successful within Lincoln County.

## LINCOLN COUNTY, NORTH CAROLINA

### JUSTIFICATION

Purchase, update and maintain software that will allow the public to locate sales information and review comparable sales which could be used to produce a property estimate. The public will be able to see the same sales information that was used for revaluation purposes. Various types of sales will be shown including valid sales which are used for revaluation. This will provide a better understanding of how values are determined. Providing public access to this information can help reduce complaints, appeals, and create a smoother evaluation process.
