## WATER AND SEWER FUND

This fund is used to account for the activities of the combined water and sewer system. On June 18, 2007, the assets of the ELWS District were transferred into this combined system. In addition, the operating and capital costs of the sewer system have been budgeted from this fund thereafter. The ELWS District remains in place to levy a tax solely for the existing debt service of that district. See the ELWS District Fund for a more detailed explanation of that fund.

The combined water and sewer system has a number of components. The water system consists of a 3.99 million gallon per day (MGD) water treatment plant located at Lake Norman. The intake structure pumps raw water from the lake to begin the process. Currently, the plant has an average daily use in the winter of about 2.5 MGD, but about 3.3 MGD in the summer. So, the County has about 0.69 MGD of excess capacity not used in the summer peak period.

The water system has two 1.0 MGD clearwells at the water treatment plant for storage of processed water. This water is then pumped into the distribution system. The distribution system consists of various size pipes and six elevated storage tanks. Given Lincoln County's topography, the system actually runs on three different water pressure zones: elevation 1010 ft. in the East; 1133 ft. in the Pumpkin Center area; and 1233 ft. in the West. That means that the elevated water tanks are set to run at one of those three elevations. Additional pumping is required to get the water from one of the three systems to the next higher elevation.

The six elevated storage tanks and their capacities are:

Denver	500,000 Gallons
NC 150 East	500,000 Gallons
Optimist Club Road	500,000 Gallons
Car Farm Road	750,000 Gallons
Northbrook	250,000 Gallons

With 3.0 million gallons of elevated storage, and 2.0 million gallons in the two clearwells, the system has a maximum of 5.0 million gallons of treated water available if all the tanks and clearwells are full. This is important should there be a prolonged line break, or a major fire that required a large amount of water.

The water system also has an interconnection with the City of Lincolnton's water system off Bethel Church Road. This interconnection allows us to obtain backup water supplies from the City if necessary. The County has a Water purchase agreement with the City of Lincolnton with approximately 0.25 MGD minimum purchase with up to 2.25 MGD allocation.

The sewer system currently consists of the collection system, with various size gravity lines flowing into 39 lift (pump) stations, which then pump the sewage through force mains to the nearest point where it can again flow by gravity, until it reaches the wastewater treatment plant (WWTP). The County built the Killian Creek WWTP on Killian Creek, which has a stream capacity of up to 8.0 MGD. The current plant capacity is 1.67 MGD. The plant is being expanded to 3.4 MGD for an estimated \$3.3 million dollars in FY 2016. The design for the 3.4 MGD expansion is completed and under review by NC DNER. The plant could be expanded in the future to the full 8.0 MGD that the stream can accommodate.

This fund accounts for the operating costs, including the debt service for the water and sewer system. The only debt not included is that for the ELWS District, which is funded from the ELWS District Fund.

A transfer is made from this Water and Sewer Fund to the W&S Capital Projects Fund to help finance any capital outlay for the water and sewer system.

The Utility has grown over the last ten years and anticipates extensive expansion in the next few years with projects to double WWTP and WTP capacities as well as line extensions. The budget includes a new position to provide additional oversight of the projects, inspection, permitting, improvements and maintenance of the Utility Department.

The County Utility Department has completed a \$3.5 Million update of the WTP in the last few years with enhancements to the chemical feed system, coatings, controls, sludge handling and other areas of the plant for process control. The WTP recently replaced the electrical feed to the Raw Water intake to provide back-up power service. Improvements were also made at the West Lincoln Booster Pump Station to allow improve flows to the Western zone. The WWTP recently complete permitting for Land Application of sludge. Killian Creek Expansion design is complete and submitted for DNER permitting. The department completed demolition of the Lake house at the raw water intake.

The new projects this year will be work on the Highway 16 business line from Highway 73. The staff will also start initial permitting and design of the WTP expansion to 8 MDG. We also anticipate working with LEDA and developers to support new projects and grants opportunities. There will also be a focus on providing new services in West Lincoln County with public outreach for the areas of need and interest. The design for the improvements to the Forney Creek WW Pump Station will be completed and bid out for construction in FY 2016.

Staff will also investigate apprentice and training programs to improve recruitment and retention of employees.

NOTES:

There are no proposed increases in the water or sewer rates, however increase in charges, or fees as outlined below with an effective date of September 30, 2015:

Same Day Service Connection from \$25 to \$50

Reconnect Lock List Fee from \$25 to \$50

After Hours Fee (Lock List) from \$75 to \$150

During FY's 2009 to 2013, this fund had experienced revenue declines associated with the lack of new construction. Building permits had dropped during that period, directly affecting the number of water and sewer tap fees for new customers, as well as the water and sewer capacity development fees.

Water capacity development fees averaged over from \$1 million in FY 2003 to FY 2008. However, they dropped in FY 2009 to FY 2013 to an average of \$262,000 annually. FY 2014 increased to \$453,200. We are projecting FY 2016 at \$800,000. There are approximately 10,700 water customers.

Sewer capacity development fees have average about \$282,000 over the last ten years with peaks FY 2007 and FY 2014. We are projecting a \$650,000 for FY 2016 based on the new developments in Lincoln County.

Water sales (monthly usage charges) have annually averaged about \$4,900,000 from FY 2008 to FY 2014. We are projecting growth to \$5,338,200 in FY 2016. The past flat trend is due to factors such as low growth, rainy years and water restrictions.

Sewer sales have averaged from about \$1,700,000 from FY 2008 to FY 2014. FY 2016 is projected to increase to \$1,800,000. The flat trend in FY 2008 to FY 2014 attributed to the low growth. There are approximately 4,300 sewer customers.

Forney Creek WWTP was taken out of service in FY 2013, and demolished. The Killian Creek WWTP upgrade from 1.67 to 3.4 MGD is scheduled for completion in FY 2016.
